Subject: New NOCSAE Chest Protector Pad is Identified

Date: November 25, 2019

We recently identified that a NOCSAE certified chest pad that protects the heart and the cardiac silhouette is being offered by chest protector manufacturers to fit on top of an existing non-NOCSAE approved chest protector making the chest protector compliant with our rules. This pad meets the criteria of our NFHS Baseball Rule 1-5-3. Coaches are responsible for knowing if their catcher's chest/body protector equipment meets the rule and should affirm that fact with the umpire-in-chief prior to the start of the ball game.

This new pad adds another alternative to the new chest/body protector rule. You now have <u>three</u> options: 1) a new traditional chest protector that protects the heart/cardiac silhouette and meets the NOCSAE performance standard; 2) a body protector (compression shirt with heart guard built into the shirt) that that protects the heart/cardiac silhouette and meets the NOCSAE performance standard <u>under</u> the traditional chest protector; 3) a chest pad that that protects the heart/cardiac silhouette and meets the heart/cardiac silhouette and meets the NOCSAE performance standard <u>under</u> the traditional chest protector; 3) a chest pad that that protects the heart/cardiac silhouette and meets the NOCSAE performance standard that fits <u>on</u> top of the traditional chest protector. As we receive more information as to what these pads look like, we will share their images with you.

NOTE: Chest pads that meet the NOCSAE performance standard are not proprietary to a specific chest protector manufacturer. (ex. A Brodell brand chest pad can be worn on a Dolan brand chest protector. It is not specific to only a Brodell brand chest protector.)
